February 2, 2009

Dear Business Partners,

K's Kids products meet all current CPSIA ACT (August 2008) requirements. Our products also meet numerous retailer requirements, which in many cases are even stricter than those of the CPSC. The following test standards have been implemented to ensure compliance with the new regulations. SGS conducts the tests for K's Kids products.

K's Kids Brand Name Requirements (Lead, Cadmium, and Phthalates):

Total Lead in surface coating / wet paint: 90ppm

Total Lead in substrate material (accessible components): 100ppm

For US Distribution only

Total Cadmium in surface coating / substrate material (accessible components only):

40ppm

Rationale behind:

40ppm for accessible components only – US requirements

Phthalates

Any toy or child care article intended for use by a child cannot contain more than 0.1% of di-(2-ethylhexyl) phthalate (DEHP), dibutyl phthalate (DBP), or benzyl butyl phthalate (BBP). Composite testing for phthalates on Toys will not be allowed.

Any toy or child care article intended for use by a child under three years of age and can be placed in the child's mouth cannot contain more than 0.1% of diisononyl phthalate (DINP), diisodecyl phthalate (DIDP), or di-n-octyl phthalate (DnOP). Composite testing for phthalates on Toys will not be allowed.

Other Requirements:

General Certificates of Conformity are provided as required.

We have obtained the ISO9001:2000 certification since 2003 and is now working towards the ICTI registration.

Yours faithfully,

Paka Preschool Products Ltd.

Sindy Lau

Brand Manager
